

Minute
Date: 26-Jan-2026
Time: 1000am-1145am
Location: LSC (UBC)

1. Columns that needed to be kept
 - Keep everything related to the topic of project for now (i.e. select all columns)
2. Division of roles
 - Group assignment 1 due this Sunday
 - Train our own classifier
 - Look through the Piazza (primary sequences provided to train our dataset)
 - Importing data manifest (Vivian by midnight Tue)
 - Denoising (Nelson)
 - Training classifier (Ben)
 - Literature review (Ivory and Ethan)
3. Progress of the project

- - Importing data using manifest file (module 4 + piazza)
 - Metadata is used to visualize
4. Evaluation of the classifier: double check with the output and confidence values (make sure they make sense)
 5. Reminder: EVA site (publication + references)
