

1. Delegate notetaker
2. GitHub access
  - a. <https://github.com/DrAstroaeus/MICB305-Group-6>
  - b. Quick tutorial on how to use
    - i. Terminal
      1. moving files
      2. `git push, git commit`
      3. Add meeting notes, agenda files
3. Project Confirmation
  - a. Progress on research questions:
    - i. ethan: how does glucose affect lymphocyte counts in people with depression
    - ii. ivory: specific taxa associated with gastric cancer?
    - iii. nelson: to what extent does the oral microbiome affect physiology (alcohol dataset?)
    - iv. ben: what is the connection between mental health and the microbiomes of patients with multiple sclerosis
    - v. vivian: what is the effect of vitamin d on EDSS (MS severity score)
  - b. Progress on the following datasets:
    - i. `depression_metadata.xlsx`
    - ii. `ms_metadata_corrected.xlsx`
      1. looked at medications?
  - c. Vote on research topic?
