

[10:01 AM start]

- make an agenda + meeting notes
 - put on github
 - make a group and send repo to avril or claire
 - no format but expect consistency and detail
 - follow the project

[10:04 AM discussion]

- ethan: how does glucose affect lymphocyte counts in people with depression
- ivory: specific taxa associated with gastric cancer?
- nelson: to what extent does the oral microbiome affect physiology (alcohol dataset?)
- ben: what is the connection between mental health and the microbiomes of patients with multiple sclerosis
- vivian: what is the effect of vitamin d on EDSS (MS severity score)

MS and depression dataset are most promising

- most novel
- check medication column for MS

[10:25 PM meeting end]
