

# Meeting Minute

## Proposal Feedback

### i) Introduction

- Include “**v**” in the citation of key programs, e.g. tidyverse (v2.0.0)
- Exact value/data might not be included in the introduction part, e.g. lower disability score (**<4**)
- More information about MS, e.g. how microbiome in MS patients differ from normal people?
- Find a better way to introduce with the research question
- Modification on the last sentence to emphasize the importance/significance of our research

### ii) Hypothesis

- More content could be included (i.e. make the content longer)

### iii) Aims

- More specific on description of the approaches (Aim 1)
- For the paper, we will take 1 paragraph for each experimental aims/rationale
- Word changing - “appearance” -> “Abundance/Prevalence”, “levels” -> “Intake”(Aim 2)
- Highlight differences between healthy people, **MS patients** and healthy patients (Aim 2) + Rationale for difference in taxa (make it clear)
- Highlight how vitamin D intake affect the difference above
- Focus on pathways of metabolism + analysis (Aim 3)
- Marker for “vitamin D” instead of “MS” (Aim 4)

### iv) Proposed approach

- Include sample depth and rarefaction (Aim)
- R functions should be included for each analysis method (Statistical test)

### v) Reference

- Incorrect citation
- Year should not be included
